

LogiKal Cross Section AluK

➤ AluK Branded Cross Sections

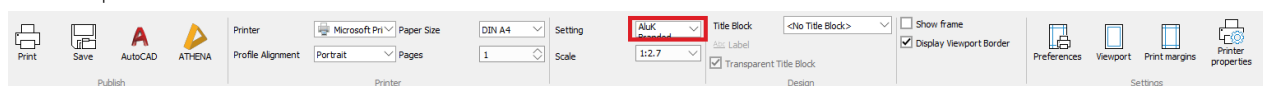

If you would like your LogiKal Cross Section Drawings to stand out amongst competitors and match the branding shown in our manuals/collateral, please follow the below guide.

AluK Branding Guide

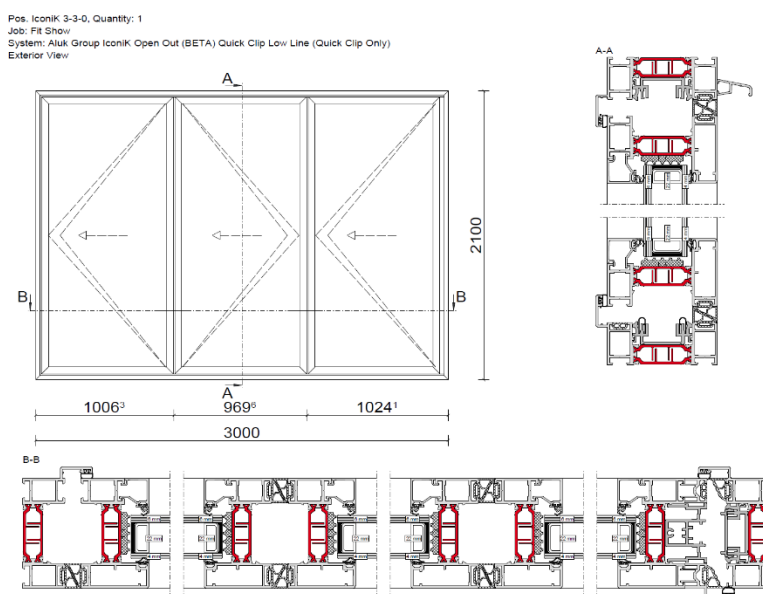

- Navigate to General > Settings > Material Display within LogiKal.
- Untick the tickbox next to "Plastic" and change the colour to brown, then select OK:

- Navigate to General > File Transfer > Restore Database. Select the "AluK Branded Cross Section.ods" file (please email BenKnight@aluk.com for the file). On the next screen, select "import" and "yes".
- Finally, run a cross section for a position and select "print". Within the top row, under the "setting" dropdown, select "AluK Branded".

- Once you print the cross section, you should then see the AluK branded cross section:

Kind Regards,

Ben Knight
